first metric, small caption

1.8×

second metric

99 %

third metric

7

fourth metric

- **Bold lead** — one line of gray explanation; keep it under two lines on screen
- **Noun phrase** — the lead names a thing, the rest says why it matters
- **Restraint** — three to five bullets per slide, never more

One punchline per slide — alone, bold, accent.

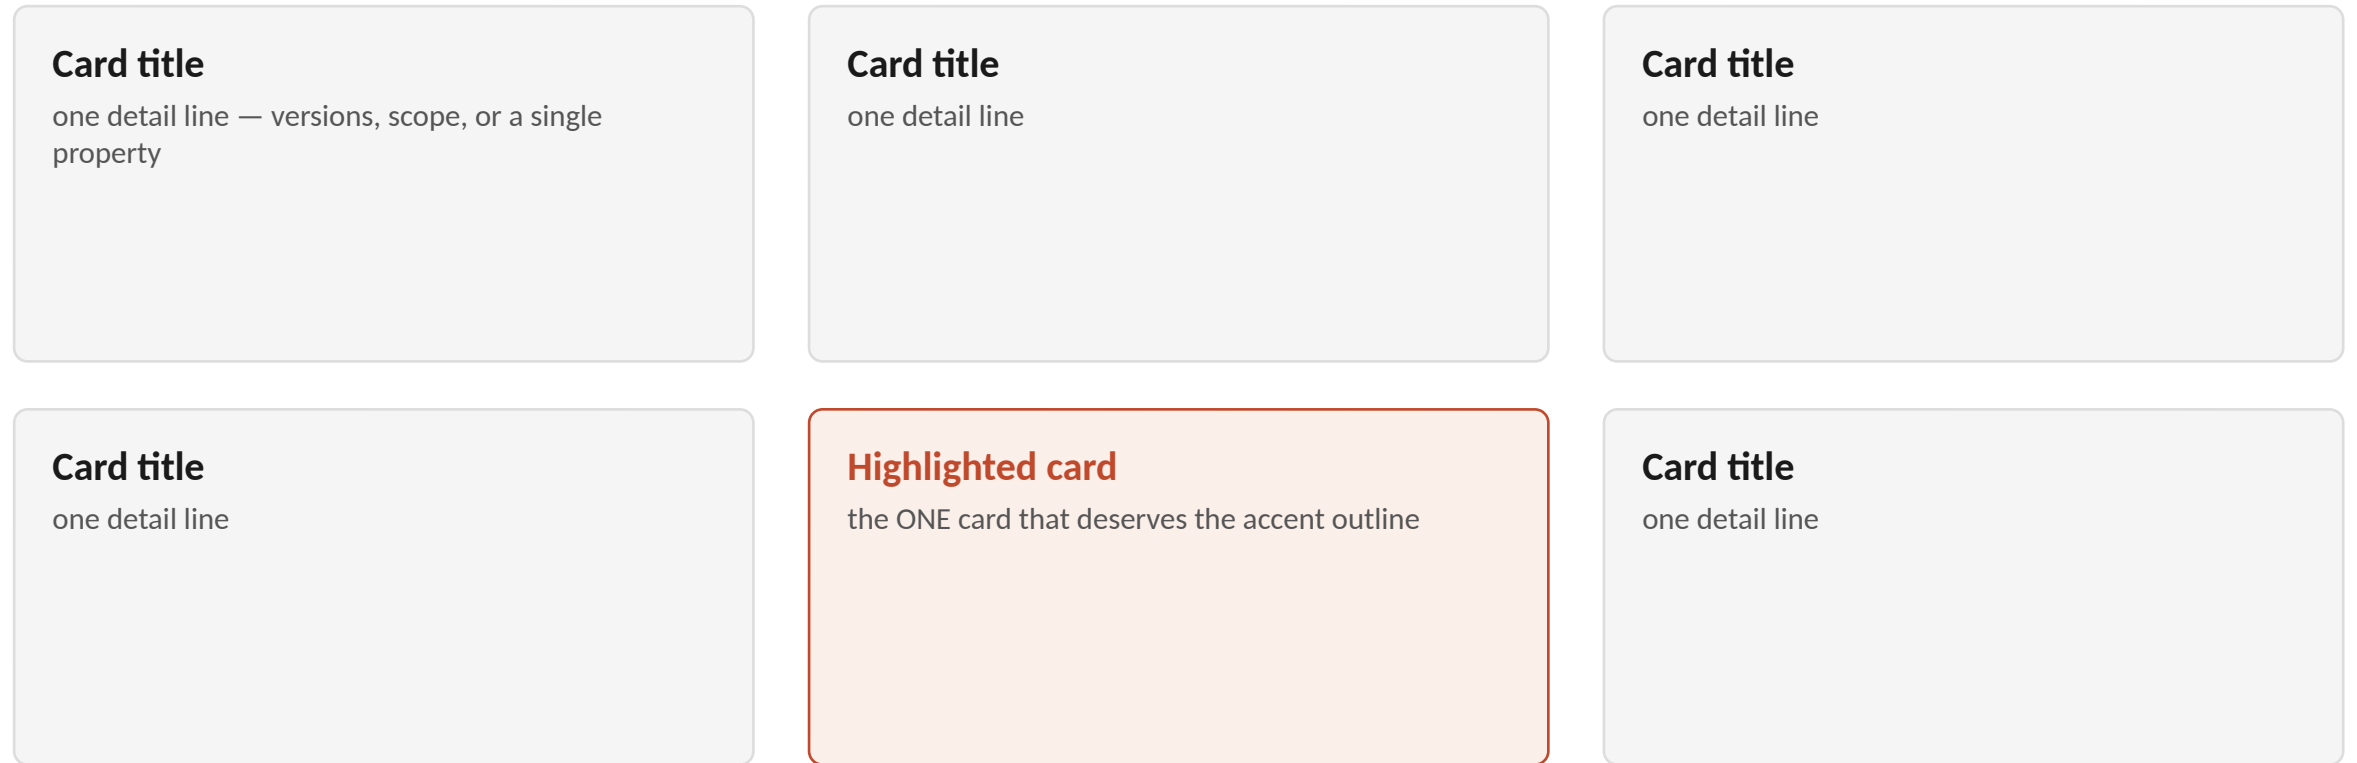

Two columns compared, row labels bold, ours in accent

	Their approach	Our approach
Dimension one	placeholder description	placeholder description
Dimension two	placeholder description	placeholder description
Dimension three	placeholder description	placeholder description
Dimension four	placeholder description	placeholder description

Header row gets the PANEL fill; keep cells to one line each; add a fifth column only if you must.

Bottom takeaway — one sentence, accent, bold.

One card per item — highlight at most one

One summary line under the grid — or leave the space empty.

A taxonomy with exactly two sides — cool left, warm right

CATEGORY A — its promise

- member one
- member two
- member three

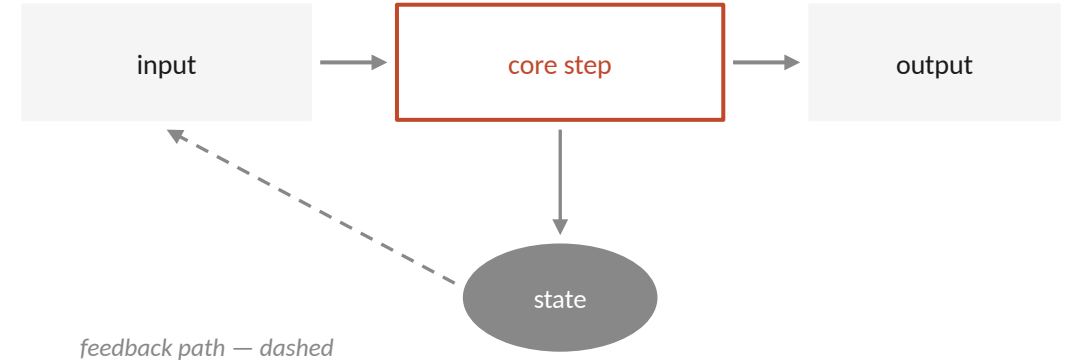

CATEGORY B — its promise

- member one
- member two
- member three

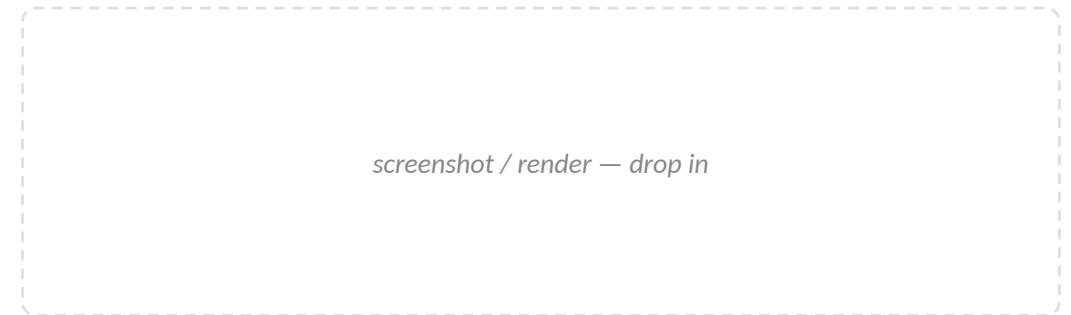

The rule that connects the two panels — centered and bold.

Bullets left, schematic right — one accent element only

- **What the boxes are** — explain the diagram in words, left of it
- **The accent rule** — exactly one element gets ACC: the thing the eye must land on
- **Placeholders** — dashed border + italic gray = 'not filled in yet', visible at a glance

Punchline about the diagram.

Close — QR left, code right, thanks centered
